

Ketch-All Pole Instructions

Instructions for Operating Standard Ketch-All Poles

1. Pull excess cable from storage hole at upper end of Ketch-All. With one hand, hold grip #2 toward middle of pole, and with your free hand, pull back on release knob #1, allowing cable to gradually slip forward through the palm and fingers. This prevents the end of the cable from whipping, and allows the other end to automatically form a loop, which is ready to use.
2. Place the loop over the animal's head or other part of body.
3. Pull the end of the cable behind the release knob. This tightens the loop around the animal, with the cable locking automatically as it is drawn in.
4. To release the loop, merely pull back on release knob as in operation number one. (If too much tension is applied to loop, the cable may fail to release. For best results, do no pull back on pole while attempting to release cable.)

Instructions for Operating Telescopic Extensions Poles

Do not suspend or lift heavy animals unless pole is retracted. When retracted, the extension pole is a heavy duty restraining device.

1. Pull back on release knob to expand loop.
2. Hold 1" tubing next to chuck, turning chuck to right to free 7/8" tubing.
3. Push 7/8" tubing forward until loop is closed.
4. Turn chuck to left, thus keeping extension in place. Repeat above steps until desired length is attained.
5. To retract telescopic pole, turn chuck to right until inner tubing moves freely, then pull cable until pole is retracted to tooth guard #5
6. When in the process of extending the pole, watch for two red warning marks on inner tubing. For best results, do not extend past second mark. If poles should become separated, release locking device, and slide back together.
7. Follow additional instructions for operating standard poles

Instructions for Care

When the Ketch-All is not in use for long periods of time, do not leave loop tightly drawn. Leave loop about half open thus taking tension off cable spring. Lubricate cable and other working parts occasionally with light machine oil through the hole at the top of release knob. Manufactured in the U.S.A., the Ketch-All is made of only high quality materials, and with proper care, it should provide long and useful service.

See diagram and parts list for identification of replaceable parts. When ordering new parts, please specify length and type (standard or extension) of pole.
